AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT				1. CONTRACT ID CODE		PAGE OF PAGES	
2. AMENDMENT/MODIFICATION NO.		3. EFFECTIVE DATE		4. REQUISITION/PURCHASE REQ. NO.		5. PROJECT NO. (If applicable)	
6. ISSUED BY		CODE		7. ADMINISTERED BY (If other than Item 6)		CODE	
8. NAME AND ADDRESS OF CONTRACTOR (No., street, county, State and ZIP Code)				(X)		9A. AMENDMENT OF SOLICITATION NO.	
						9B. DATED (SEE ITEM 11)	
						10A. MODIFICATION OF CONTRACT/ORDER NO.	
						10B. DATED (SEE ITEM 11)	
CODE		FACILITY CODE					
11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS							
<input type="checkbox"/> The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers <input type="checkbox"/> is extended, <input type="checkbox"/> is not extended. Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods: (a) By completing items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.							
12. ACCOUNTING AND APPROPRIATION DATA (If required)							
13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.							
CHECK ONE	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.						
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).						
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:						
	D. OTHER (Specify type of modification and authority)						
E. IMPORTANT: Contractor <input type="checkbox"/> is not, <input type="checkbox"/> is required to sign this document and return _____ copies to the issuing office.							
14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)							
15A. NAME AND TITLE OF SIGNER (Type or print)				16A. NAME AND TITLE OF CONTRACTING OFFICER (Type or print)			
15B. CONTRACTOR/OFFEROR		15C. DATE SIGNED		16B. UNITED STATES OF AMERICA		16C. DATE SIGNED	
_____ (Signature of person authorized to sign)				_____ (Signature of Contracting Officer)			

The following changes are made to the Specifications and Drawings for River Chamber Demolition, Charleroi Locks and Dam, Monongahela River, Pennsylvania:

Standard Form 1442, Solicitation, Offer and Award, Block 13A. The proposal due date has been changed from “22 JULY 2003” to 29 JULY 2003. The time is not changed.

Section 01100, Page 21, Paragraph 3.1.2.3, Subparagraph f. Delete the existing subparagraph f and insert the following in lieu thereof:

f. The Contractor shall ensure that no floating plant impact occurs to the stabilization H-piles for the lower guard wall, any portion of the lower guard wall, the lower river wall, or the diaphragm support cell concrete cap. The Contractor shall submit a mooring plan as part of submittal "Access to the Site" in accordance with paragraph "SUBMITTALS", for approval of the Contracting Officer that adequately addresses the restrictions of this paragraph. The mooring plan shall detail means and methods that ensure the Contractor's floating plant will not impact or set upon the stabilization H-piles for the lower guard wall, any portion of the lower guard wall, the lower river wall, or the diaphragm support cell concrete cap. Equipment, including floating plant, shall not be placed on top of the diaphragm support cell concrete cap, except for the installation of the stabilization features required at the diaphragm support cells at the lower river wall and lower guard wall.

Section 02220, Page 7, Paragraph 3.2.3, Second Paragraph. In the first sentence, after “face of the lock walls”, add the following: and sheet piling within five (5) feet of the lock walls.

Section 05502, Page 6, Insert the following paragraph after paragraph 3.1 and renumber the existing paragraph 3.2 to 3.3:

3.2 STRUT END PLATE AND BEARING PLATE FINISHING

Surface finishes indicated or specified shall be in accordance with ASME B46.1. Values of required roughness heights are arithmetical average deviations expressed in microinches. Compliance with surface requirements shall be determined by sense of feel and visual inspection of the work compared to Roughness Comparison Specimens in accordance with the provisions of ASME B46.1. Values of roughness width and waviness height shall be consistent with the general type of finish specified by roughness height. Flaws such as scratches, ridges, holes, peaks, cracks or checks which will make the part unsuitable for the intended use will be cause for rejection.

Drawing 037-LCH-19/3. For clarification purposes, per the "vertical seal detail" on drawing 19/3, the vertical timber seals are to be placed at every other pile at the interface of the closure cells and the existing walls. The limits, station to station, of the vertical

seals at the upstream and downstream closure cells are shown in the "closure cell plan" views of drawings 19/1 and 19/2 respectively. Also, per the "vertical seal detail" on drawing 19/3, the timber seals will have to be adjusted to avoid interference with the port closure plates detailed on drawings 19/7 through 19/9.

Drawing 037-LCH-91/10.1 Change the drawing number to 037-LCH-19/10.2. Delete Note 2, and replace it in its entirety with the following: The contact surface between each bearing plate and end plate shall be finished to a required Roughness Average (Ra) between 63 microinches and 125 microinches. See Specification Section 05502 for additional information.

Reference note in Amendment No. 0001 stating that no additional questions will be accepted. This note is rescinded and replaced with the following note:

NOTE: The Government will entertain additional questions but reserves the right to determine whether and/or how any questions received will be addressed.

This amendment will be issued via the internet only.
